

KSM Inc.

SPEAKER BIOGRAPHY:

Dean T. Kashiwagi, PhD, PE, IFMA Fellow

Director

Kashiwagi Solution Model Inc.

CIB W117 Performance Measurement in Construction

Editor of W117 Journal "Advancement of Performance Information and Value"

A thought leader in the facilities management, procurement, project management, and supply chain industries for more than three decades. He is also a respected adviser and mentor within IFMA. Dean has received numerous awards for the implementation of the best value approach that includes how an entire country (the Netherlands government) changed their model in buying not only construction, but professional services as well. He is credited with establishing best value programs at six different universities around the world. This includes receiving a Fulbright Scholar award to share state-of-the-art best value procurement model and project management research/practices for the people of Botswana, Africa. Dean's groundbreaking best value approach [model for the future] was integrated into a graduate program and put into practice at ASU for outsourcing food services. The results at ASU led to an investment of \$100 million first of its kind and the vendor is still surpassing their milestone goals for the University.

He is responsible for creating tools that are simple, yet have dominant impact in the entire professional supply chain [from procurement, to managing an entire project, to the full maintenance of the service after completion]. Dean has tested his best value concepts, which is the most licensed technology out of Arizona State University in the last 25 years [54] on over 2000+ projects [\$4B in construction and \$2B in non-construction services], with 98% success (on time, within budget, and client highly satisfied).

In 2017, Dean retired as a full professor from ASU [25 years], and is now focusing all his efforts to champion more programs to advance the facility management profession and prepare the next generation. Prior to ASU, he served 14 years in the U.S. Air Force and retired as a Major.
